The University of Maryland commits to becoming a global leader in advancing social innovation, philanthropy and nonprofit leadership with its Do Good Campus.

Our Do Good Campus effort amplifies the power of Terps as agents of social innovation and supports the university’s mission of service. We’re working to ensure all University of Maryland students graduate equipped and motivated to do good in their careers, their communities and the world.

We:
- Created the Do Good Institute to serve as the campus hub of social impact and innovation;
- Developed a Do Good Challenge and Do Good Accelerator to scale up the impact of student projects and ventures;
- Cultivate new research on philanthropy, civic engagement and nonprofits;
- Expand opportunities for students to learn about and practice giving back.

Our Do Good campus will lead to a Do Good world.

For more information, visit dogood.umd.edu.
Dear Class of 2021,

Congratulations! The conferral of your degree is a milestone achievement that brings great pride to your family, friends and the University of Maryland.

We celebrate this occasion with incredible excitement and enthusiasm. While the ongoing COVID-19 pandemic has presented unprecedented challenges for your class, your time at Maryland has been marked by great intellectual and personal accomplishments as well as positive contributions to our community and beyond.

The faculty, staff and administration of the university are confident that you are prepared to continue on a path of excellence. Now is the time to make your mark in addressing the grand challenges of our time, from COVID-19 and racial injustice to climate change and voter access.

Along the way, take heart in your new family of Terp alums, over 388,000 strong. We are all connected by our love for this university and our dedication to using our knowledge and experiences to better serve our neighbors and our world.

My very best wishes to your family and friends. Good luck and stay TerrapinSTRONG!

Sincerely,

Darryll J. Pines
President, University of Maryland
Glenn L. Martin Professor of Aerospace Engineering
On behalf of the University of Maryland Alumni Association, congratulations on your graduation! I want to welcome you into our family of more than 388,000 Terps.

The world has changed so much in the past year, something you have experienced firsthand. You and your graduating class have been put to the test, and you've passed with flying colors. You are now officially a graduate of the University of Maryland, and I want to take the opportunity to make you a promise: your Alumni Association is going to be here for you, because we are fearlessly committed to your success.

As our gift to you, please enjoy one free year of membership in the Alumni Association, after which I encourage you to make a commitment to your alma mater by becoming a lifetime member. By becoming a Terp for life, you will leave your own legacy and show your support for the University of Maryland.

Your Alumni Association and your membership will help you stay in touch with friends you made on campus, prepare you for your career through networking and professional development, and keep you informed about alums and campus news. You can also take advantage of our newly expanded member benefits, including exclusive virtual learning opportunities and a Member Masterclass series that helps you develop both personally and professionally.

It is my wish that as an alum, you will wear our colors proudly and continue to demonstrate to the world the high-quality education Maryland provides. In turn, Maryland will continue to educate the country’s brightest students, pursue cutting-edge research, encourage innovation and entrepreneurship, explore the arts and defend our athletics titles. As a student, and now as a graduate, you will always be a Terp and always have a home at Maryland at the Samuel Riggs IV Alumni Center—be sure to visit us when you come back to campus in the years ahead.

Now go forth with the strength of your Maryland degree, and remember that your Alumni Association is here to help you stay active, stay informed, stay connected and stay fearless.

Go Terps!

Jim Spencer ’90
President, University of Maryland Alumni Association Board of Governors
While Hannah Rhee was researching colleges, she came across a question on a University of Maryland website that stuck with her: Do you want to change the world? Yes, she did, and a campus tour by the Minnesota native drove home the reality that she could pursue that goal in College Park.

“I could really sense the community,” she says. “My time at Maryland has really given me time to decide my own identity.”

Graduating four years later with a bachelor’s degree in computer science during an ongoing pandemic has only affirmed Rhee’s confidence that she gained the tools to help build a better world through technology.

“I can use my computer science skills to have that kind of impact on people’s public health,” she says. “We are so interconnected and dependent on each other.”

One of the most formative experiences for Rhee, who earned a 3.921 GPA while minoring in nonprofit leadership and social innovation, was participating on a research team as part of the Gemstone program in the Honors College. Under the guidance of Jae Kun Shim, professor of kinesiology in the School of Public Health, Rhee and her teammates researched musculoskeletal disorders that can develop in musicians. While the impact of COVID-19 limited the amount of in-person work that could be done, Shim says, Rhee was a leader in identifying how these problems affect women more frequently than men, a vital foundation for future research.

“She has excellent work ethic and is very dedicated to any task given to her,” Shim says. “She is very sincere and warmhearted.”

In addition to her academic work, Rhee was a software engineering intern for Orbit Logic in Greenbelt, Md., a student advisory board member for the Department of Computer Science and a mentor for the Girls Excelling in Math and Science program.

After graduation, she plans to undertake a year of volunteer work before entering the software industry and eventually becoming a high school computer science teacher.

“I really like the problem-solving aspect of it, and how logical the whole process is,” Rhee says. “There’s a lot of reward when you finally have that breakthrough.”
Even in a class of high-achieving Honors College students, Sherry Fan’s intellect and enthusiasm stood out.

A dedicated researcher, devoted volunteer to fighting hunger and poverty, and burgeoning artist in communicating complex science, Fan is graduating with a 4.0 GPA and a dual degree in biological sciences and nutritional science. “In my 42 years teaching at UMD, I have never taught an undergraduate student with a stronger academic record,” says Todd J. Cooke, research professor in the Department of Cell Biology and Molecular Genetics and founding director of the Integrated Life Sciences Program in the Honors College.

The daughter of an immigrant from rural China, Fan grew up in Montgomery County, Md., hearing his stories about not having enough food or fresh water—a motivation to seek ways to help those in dire need. She became a National Merit Scholarship finalist and earned a Banneker/Key Scholarship at the University of Maryland, where she joined the Food Recovery Network to reduce campus food waste and served meals at homeless shelters in Washington, D.C., as a member of UMD Tzu Ching.

“I wanted to be able to give back to communities who were facing similar insecurities,” she says. “It was a personal issue to me.”

Fan worked for three years with Professor Wenxia Song on uncovering the cellular relationship between obesity, chronic inflammation and insulin resistance, and spent two summers interning at the University of Maryland School of Medicine, studying a cancer-promoting protein that could help with new treatments and analyzing potential genetic markers for aortic aneurysms. Fan will be a co-author on an upcoming paper in the peer-reviewed journal *PLOS ONE*.

Beyond the lab, Fan led service trips to Kentucky and made coloring books for patients at the Children’s Inn at the National Institutes of Health—a talent that also landed one of her drawings with an article in *Virology*.

After graduation, Fan will pursue a dual M.D./Ph.D. at Cornell University and hopes to eventually work at an academic medical center to integrate service, research, art and teaching. “I’ve grown a lot as a student but also as a human being during my time at UMD,” she says. “I was really able to step outside my own bubble.”
A builder and inventor with more than 40 years of leadership in software engineering, Peter Chapman is at the forefront of what could become the 21st century’s defining technology.

Chapman is president and CEO of IonQ, a company founded on research from the University of Maryland, among others, and headquartered in the Discovery District, that’s vying to commercialize quantum computing. Still in its infancy, the field aims to harness quantum physics to exponentially accelerate some computer operations, potentially unlocking advances in everything from security and artificial intelligence to chemistry and drug discovery.

The son of a NASA scientist-astronaut, Chapman began his career at age 16 in the Massachusetts Institute of Technology Artificial Intelligence Lab. In 1989, he founded the video game company Level Systems Inc. and later invented the first sheet music-reading synthesizer capable of recreating orchestral instruments.

He built on these accomplishments in the financial and technology sectors, with software breakthroughs that protect mutual funds, power e-readers and assist the blind in reading. Chapman also helped create the world’s first fully automated algorithmic trading system for the stock and commodity markets.

Prior to coming to IonQ in 2019, Chapman spent nearly five years as the director of engineering for Amazon Prime, managing hundreds of engineers to ensure speedy delivery, including its two-days-or-less shipping option.

His driving goal, however, is true artificial general intelligence—meaning a system able to match human learning and understanding. Although an impossible standard decades ago when he first started with computers, it’s one he sees as achievable through quantum technology. Quantum computing in general, Chapman believes, will be key to solving some of humanity’s greatest challenges, such as climate change and disease.

In his spare time, Chapman enjoys woodworking and is currently rebuilding a 1973 Super Beetle from his childhood.
Doctoral Degrees

The doctoral degree is the most advanced earned degree conferred by American institutions. There are two distinct types: the practitioner’s degree and the research degree. The first type represents advanced training for the practice of various professions, principally doctor of audiology, doctor of medicine, juris doctor, doctor of pharmacy and doctor of veterinary medicine. These degrees do not involve the completion of original research by the student. The University of Maryland, at the professional school in Baltimore, awarded the first two dental degrees on March 9, 1841.

MAY 2021 CANDIDATES

DOCTOR OF AUDIOLOGY

Danielle A. Addington
Taylor A. Bakal
Alyssa Frenette
Kelly C. Johnson

Master’s Degrees

The master’s degree is an academic honor bestowed upon students who have successfully completed work beyond the baccalaureate. A thesis and an oral examination are usually required. In 1920, the University of Maryland awarded its first Master of Arts and Master of Science degrees in fields other than agriculture.

Bachelor’s Degrees

The bachelor’s degree represents the completion of a four-year course of college-level study and is the oldest academic degree awarded by American institutions of higher learning. Maryland Agricultural College, which later became the University of Maryland, College Park, awarded its first Bachelor of Arts and Bachelor of Science degrees in 1862.

Note: Latin Honors published in the commencement program are tentative and unofficial, pending the submission and calculation of all final grades for the semester of commencement.

MAY 2021 CANDIDATES

COLLEGE OF AGRICULTURE AND NATURAL RESOURCES

Bachelor of Landscape Architecture
*Maegan Elayne Berger
Tian Joseph Burkhart
Antonio Adolfo Escobar
Ryan Tyler Herilla
Ian Kisaky
Linda Marie MacSorley
Dayanara Ivette Padilla
Lauren Christine Sheredos
Abigail Teresa Smith
*Emily Julia Stancliff
Ryan Andrew Young

Bachelor of Science

Agricultural and Resource Economics
Sebastian Alberto Bohorquez
*Pengpeng Cai
2nd Major: Mathematics
Ryan Matthew Coffey
Axel Demmerle
*Sagar Sudhir Desai
2nd Degree: Finance
Patrick Jason Ellman
Ezekiel Agape Fernandez
Yiwei Hou
Paul Christian Janniche
*Rebecca Nichol Jones
Fashun Lu
Jason Carl Ludwig
Brandon Tyler Martinez
2nd Degree: Philosophy
Colin Kellogg McKinlin
Yu Meng
Andrew Paul Omenitsch
Blake Christian Rose
Daniel Aaron Smith
Zachary William Spieth
2nd Major: Criminology and Criminal Justice
*Elizabeth Anne Thilmany
Jesse Vidal Turcios

Agricultural Science and Technology
Shana Nicole Burke
Christopher Vincent Chansler
Alexandre Arthur Delacotte
Reilly Quinn Escalante
*Adelaide Elizabeth Figurskey
Emily Alex Keasler
Daniel Louis McGee
Cody Martin Morris
Ashley Elizabeth Morse
William Daniel Phillips Jr.
*Aliza Rosalyn Poon
*Jingru Wang
2nd Degree: Mathematics
Xinyi Wang
2nd Degree: Mathematics
*Haoyue Zhou

Animal Sciences
Jordan Hannah Albom
Laurelee Do An
Ian Gill Bemis

Special Recognition

SENIOR MARSHALS
The Senior Marshal Program began in 1991 as an opportunity to acknowledge outstanding seniors at their commencement. The students selected to be marshals were nominated by faculty, administration and staff for their outstanding accomplishments and contributions to the University of Maryland. We are proud to recognize these truly remarkable students.

Intercollegiate Athletics Facilities
Memorial Chapel
Public Safety
Senior Council
Stamp Student Union
Transportation Services

An extra special thanks go to the Office of the Registrar and the Graduate School.

A heartfelt thanks go to the many volunteers who assist with the campus-wide and individual college and school ceremonies. These efforts are greatly appreciated.
The May 2021 class roster comprises degree candidates from the graduate and undergraduate programs at the University of Maryland, College Park. As final action cannot always be taken for candidates by the time this program is printed, the list of candidates here is tentative. The university reserves the right to withdraw or add names. Diplomas (for other than doctoral degrees) will be mailed by the Office of the Registrar.
Hail! Alma Mater

Hail to thee, Maryland!

Steadfast in loyalty,

For thee, we stand,

Love for the Black & Gold

Deep in our hearts we hold,

Singing thy praise forever,

Throughout the land.
